1988 EDITORIAL INDEX

MANAGEMENT

Managing quality Jan.p.16
Defining quality in service businesses Jan.p.56
Effecting a quality plan of action . Jan.p.59
Managing quality in steel . . . Feb.p.16
Productivity pays at Nucor . . Feb.p.18
Worthington's human resources Feb.p.22
Effective quality improvement management Feb.p.70
Running a quality company: Boeing Mar.p.16
IRS commits to quality service . Apr.p.16
In-house gage block calibration . Apr.p.76
Total quality, just-in-time, computer-integrated manufacturing: Partners, not competitors . Apr.p.84
Quality at Campbell Soups . . May.p.14
Lighting up quality Jun.p.16
From the top Aug.p.14
Manage the process Sep.p.14
Instrument makers target QC labs Sep.p.44
Kanban and Deming's 14 Points Sep.p.50
CIM speeds quality Oct.p.14
Hewlett-Packard's quest for quality. Nov.p.16
Built-in production quality at Greeley Nov.p.20
Quality pays Nov.p.26
Whirlpool's world market . . . Dec.p.18

INSPECTION

Industrial film speeds offshore welding application Jan.p.40
Fluoroscopic inspection. . . . Jan.p.44
NDT is changing— slowly but surely Jan.p.20
NDT customers: What do they want? Jan.p.20
Automating radiographic NDT . Jan.p.26
High-speed imaging of complex composite parts. Jan.p.30
Instruments for measuring product appearance. . . . Jan.p.28
Vision technology for parts inspection Mar.p.29
Consumable goods inspection Mar.p.36
Machine vision for the small shop Mar.p.42
Tachometer inspection Mar.p.46
Inspection services/ measurement "for hire" . . Apr.p.52
Automatic gaging comes of age . Apr.p.60
Metrology networking. Apr.p.66
Computerized gage control systems Apr.p.72
Measurement reliability Apr.p.80
Advanced hardness testing . . May.p.29
Color/appearance analysis . . Sep.p.38
Counterfeit bolts Oct.p.26
Inspecting for prototype quality Nov.p.48
Closed-loop compensation tied to inspection Dec.p.54

PROCESS QUALITY CONTROL

The quality network Feb.p.48
Foam data Feb.p.54
Product return rates. May.p.38
Collecting data for SPC Oct.p.22
Statistical problem solving . . . Dec.p.24
Rational samples— not random samples Dec.p.30
SPC in the process industries . Dec.p.38
Math for processes Dec.p.44

QC IN MANUFACTURING

Evolution of a quality program for x-ray film Jan.p.34
Semiconductor component testing. Feb.p.36
Computerized QC program saves dollars . . . Feb.p.58
Fill-weight accuracy improved . Feb.p.62
Parts counting speeded Feb.p.66
Setting new quality level for food ingredients Mar.p.52
Lessons learned Dec.p.49
SPC for short production runs . Dec.p.58

PROCUREMENT

Targets for excellence. Sep.p.18
Multiple source: a procurement myth Oct.p.54
A new role for QA. Oct.p.56

QUALITY ENGINEERING

Nonparametrics—an alternative to the "F" test-Wilcoxon rank sum test for equal dispersions Jan.p.52
Nonparametrics—an alternative to the one-way ANOVA. . . Mar.p.68
Laser-based outside diameter measurement Mar.p.56
Redefining coordinate metrology Apr.p.20
Probing for the versatile CMM . Apr.p.34
Constant contact, a new probing dimension. Apr.p.42
Omnisip, a new three-dimensional probe . . Apr.p.46
In search of quality software . . Jun.p.26
Software for the right side of the brain Jun.p.41
Combining MIS and SPC . . . Jun.p.46
SPC and software for quality. . Jun.p.52
Automating GD&T Jun.p.56
Quality software update-June 1988 . . . . . Jun.p.62
Now that's a profilometer . . . Aug.p.24
Surface performance and cost . Aug.p.18
CMMs—Present and future . . Aug.p.Q1
The state-of-the-CMM-art . . . Aug.p.Q5
CMM designs Aug.p.Q6
Ceramic components in CMMs Aug.p.Q12
Shaping coordinate measuring Aug.p.Q18
CMMs for the 21st century . . Aug.p.Q26
The measurement party line . Aug.p.Q32
Driving CMMs. Aug.p.Q38
ESD control. Sep.p.24
The new ESD workplace Sep.p.30
Particle size. Oct.p.38
Metrology training, academic style. Oct.p.45
Environmental cube Oct.p.50
Modular gaging and fixturing . . Oct.p.60
Taguchi basics Nov.p.30
Designing-in quality Nov.p.34
Defining unknown geometries . Nov.p.40

RELIABILITY ENGINEERING

Improving quality through on-line testing Feb.p.43
On time project Mar.p.63
Alumina ceramic metrology tools. May.p.22
Burn-in Aug.p.30
Engineering and high-performance plastics Nov.p.56

QUAL LAB

Data needs transforming QC labs . . . May.p.Q2
Data quality with LIMS May.p.Q12
Essentials of automated labs . May.p.Q4
LIMS in the quality laboratory . May.p.Q8

INSTRUMENTATION SCOUTING REPORTS

Vendor communications and mainframe functionality . . . Jan.p.75
Vision technology for the packaging industry Mar.p.75
Saving QC time with radiographs Apr.p.93
Automated penetrant inspection system increases productivity. . . . May.p.83
Automatic fastener testing . . . Jun.p.83

Hydromechanical valve inspection improved Aug.p.85
Digital data recorder has computer interfacing Sep.p.57
New RTP-670A quadruples recording time Sep.p.57
Motion analyzer detects problems. Oct.p.73
Laser system verifies lead screw accuracy Nov.p.65
Rolls-Royce uses NDT Nov.p.65
Freeze concentration processing Dec.p.73

BASIC TRAINING REVIEW

Surface plate method for measuring tapered-thread pitch diameter Jan.p.73
Reliability growth monitoring . . Feb.p.87
MTBF and reliability Mar.p.73
Gaging precision Apr.p.91
Measurement system performance analysis . . . May.p.81
Charting individuals for a truncated distribution Jun.p.81
T-test Aug.p.83
Sampling and confidence . . . Sep.p.55
Acceptance and rejection demonstration Oct.p.71
The exponential reliability curve Nov.p.63
Computing confidence for quality levels. Dec.p.71

EDITORIAL COMMENT

The right direction for NDT . . . Jan.p.5
The word is out Feb.p.5
Something of value. Mar.p.5
A dose of reality Apr.p.5
What about tomorrow? May.p.5
Attitude adjustment Jun.p.5
Buyers Guide—A cure for the "Whoops!". Jul.p.5
On preaching and practicing . . Aug.p.5
Better late than never. Sep.p.5
Quality-however you look at it . . Oct.p.5
Quality—Are you getting what you're paying for? Nov.p.5
Tools are not solutions Dec.p.5

QUALITY WATCH

Superconductivity: Quality's fad, fancy or future? Jan.p.13
New chip technologies pace revitalized semiconductor industry . . Feb.p.13
Assembled finished product cost is the cost that counts. Mar.p.13
Supercomputers—in the wings for quality applications Apr.p.13
Sharp rise in automation spending due in next decade May.p.13
High Qual Expo TIME turnout accents quality role in US manufacturing spurt . . .Jun.p.13
Sematech chooses five "centers of excellence" for better chip manufacturing Aug.p.13
Volt and ohm values will undergo change to achieve international accord Sep.p.13
Bush, Dukakis look to regain US competitiveness. Oct.p.13
Hearing is not doing Nov.p.13
Efforts to relate CMM data to design specifications underway . . Dec.p.13

QUALITY AND THE LAW

A function of timing. Jan.p.77
Beast of burden Feb.p.94
Common sense and common knowledge Mar.p.76
Tooth for a tooth Apr.p.94
Victim of circumstance May.p.87
Mechanics. Jun.p.86
Intangible as smoke Aug.p.88
A call to action Sep.p.60
The cost of a day in court Oct.p.77
The letter and the law Nov.p.69
Aftermath Dec.p.75

THE QUALITY SCENE

Quarterly quality Jan.p.79
Asleep at the switch Feb.p.97
What is chaos? Mar.p.78
Japanese nomads Apr.p.97
Requirements! May.p.89
The new human race Jun.p.88
Spans of control Aug.p.90
Ubiquitous QC Sep.p.62
Monitoring Oct.p.79
Ergonomic quality. Nov.p.71
Irresistible technology Dec.p.77

MANAGEMENT VIEWPOINT

The CEO's essential ingredient . Jan.p.81
Cost cutting or cost management? Feb.p.99
The managerial woman Mar.p.80
Quality customer service . . . Apr.p.99
Labor/management cooperation May.p.91
Restructuring. Jun.p.90
Management magic. Aug.p.92
The public sector Sep.p.64
Customers wanted Oct.p.81
The global marketplace Nov.p.73
CEO role changing Dec.p.79

QUALITY AT RANDOM

Statistics is the cart—quality is the horse Sep.p.82

AUTHORS

Ackroyd, Peter Aug.p.18
Allor, Phillip Sep.p.18
Aman, John Jan.p.26
Bajaria, Hans J. Dec.p.24
Barnes, Paul Feb.p.28
Billingsley, John. May.p.22
Bentler, Keith Apr.p.86
Boothe, Davis R. Dec.p.58
Boyer, Michael G. Sep.p.24
Brown, Arthur. May.p.Q8
Brown, Mark G. Jan.p.56
Burke, III, William J. Mar.p.29
Campbell, Allan. Apr.p.66
Casciero, Janet. Sep.p.38
Ciampa, Dan Apr.p.84
Cohen, David A. Mar.p.56
Copp, Richard P. Dec.p.24
Dancisin, Andrew J. Jan.p.44
Dovich, Robert A. Jan.p.52
Dovich, Robert A. Mar.p.68
Dunda, Jack Apr.p.60
Dwight, John E. Jan.p.20
Dybeck, Martin Dec.p.44
Ealey, Lance Nov.p.30
Enrick, Norbert L. Nov.p.63
Ermer, Donald S. Dec.p.30
Garcia, Christopher J. Jun.p.56
Gibson, Dave. May.p.Q4
Gilman, William R. Apr.p.20
Goranson, Burt Jan.p.20
Heckel, Jim Nov.p.16
Heldt, John Nov.p.26
Hertzler, Paul H. Apr.p.72
Heyes, Gerald B. Aug.p.83
Hicks, Jack Nov.p.40
Huthwaite, Bart Nov.p.34
Ingham, Jonathan Sep.p.30
Isabelle, Donald L. Jan.p.73
Jarman, Tom Apr.p.34
Jones, Edward R. Dec.p.49
Jorgensen, David G. May.p.81
Landon, Wanda G. Sep.p.50
Maggio, Tony Feb.p.43
Masters, Jonathan Mar.p.36
Maysek, Peter Mar.p.46
McCarthy, Brian Jun.p.41
McGue, Frank Dec.p.30
Mengden, David Nov.p.56
Miller, Evan J. Jun.p.46
Montgomery, Scott. Feb.p.70
Mott, Richard Oct.p.26
Papurt, David M. Mar.p.56
Paul, Scott D. Feb.p.87
Pennucci, Nicholas J. Mar.p.73
Pennucci, Nicholas J. Oct.p.71
Pettavel, Jacques Apr.p.46
Pfeifer, Charles G. Dec.p.38
Phelan, Robert J. Jan.p.34
Raceina, Terry Feb.p.54
Rathman, Barbara A. Jun.p.52
Reed, Dale Oct.p.56
Reimann, Curt W. Oct.p.31
Reno, Bud. Oct.p.50
Sandhu, J.S. Jan.p.30
Sebellin, Pierre Apr.p.46
Seiver, Marvin H. Oct.p.54
Shay, Bruce P. Apr.p.91
Shelter, Byron L. Apr.p.80
Shelton, Russ Apr.p.42
Shertz, Robert S. Jan.p.59
Silva, Milton Mar.p.63
Smith, Bruce. Aug.p.30
Stanley, Hal Oct.p.38
Stewart, Rod. Feb.p.36
Suor, Edward W. Feb.p.48
Tejeda, Al Feb.p.36
Theriault, Norman Nov.p.48
Tietyen, Dave Mar.p.42
Treleaven, Stanley B. Dec.p.54
Turk, Nicholas J. Jun.p.81
Vasilevski, Michael Sep.p.24
Wiener, Jonathan L. Jun.p.26
Wilkins, Larry Oct.p.60
Wurster, Ralph. Aug.p.24
Wurster, Ralph. Sep.p.82
Yellman, Ted W. Sep.p.55
Zurcher, Robert G. Mar.p.32
